

We're asking you to sponsor this wonderful mind-sport, and to invest in the future generation. All of our team's activities require about \$40,000 to run each year, and we need sponsors like you to help us continue promoting STEM within our community. We are your future engineers, businessmen, graphic designers, programmers, and tradesmen. As a sponsor of our team, you'll receive recognition as shown below. We'd love to hear back from you by February 11th, 2022 so that you can have a place on our team shirts!

We appreciate your support in all forms, including the use of machinery, internships, tours, and mentors for our team. If you would like to learn more, please contact us at Kentridge.robotics@gmail.com!
