Charger Robotics Team 3786

CHARGER ROBOTICS

INNOVATE, CREATE, INSPIRE

We are the 3786, Charger Robotics Team at Kentridge High School. Our team is part of the FIRST Robotics Competition (FRC), an international “sport for the mind” for students between 14-18 years old.

What is FIRST Robotics?

FIRST teams around the world design, build, and program a new 120lb robot from scratch in six weeks to compete by solving a new challenge each year. We compete against other high school teams from across Washington. Top teams from local competitions move on to the Pacific Northwest District finals and then on to the World Championships in Houston, Texas.

Teams operate as a small manufacturing business, with sub teams such as: marketing, design, and control systems. During the build season, we spend twenty or more hours per week outside of school hours to design, build, and program our robot. In the off season, we spend our time holding events to inspire the next generation of students. Our students gain valuable hard skills designing and building our robot, but even more soft skills, leading, working as a team, and planning. We strive to prepare

students to enter the college and the workforce as leaders with critical problem solving skills. We pride ourselves in our mission to spread STEM education in the community, making robotics accessible to all students.

How can you help?

To accomplish our goals, we need your support. Our team’s activities require \$30,000 per year. With this budget, we build a robot, travel to events and run STEM events in primary and middle schools in our community. We are your future engineers, business leaders, graphic designers, programmers, and tradespeople. As a sponsor of our team, you’ll receive recognition based on the donation amount. We would love to see your business name on our robot, shirt, banner, or website. We need to hear back by January 20, 2023.

100% of your contribution goes to support Charger Robotics team.

We are supported by [Kentridge Booster Club](#), a 501(c)(3) organization.

Recognition for Sponsors

<p>Gold Level: \$4,000+ Company announced in official team name at all competitions Company logo on team shirt, pit banner, robot, and website</p>	<p>Silver Level: \$2,500 - \$3,999 Company logo on team shirt, pit banner, robot, and website</p>
<p>Bronze Level: \$1000 - \$2,499 Company logo on team pit banner, and website</p>	<p>Green Level: \$100 - \$999 Logo on website</p>

Ways to Donate to Charger Robotics

<p><u>Option A: Donate Online</u></p> <p>You may donate online through the Kentridge Booster Club PayPal page. https://chargerrobotics.com/donate</p> 	<p><u>Option B: Donate by Check</u></p> <p>Mail checks to: Kentridge High School Booster Club Charger Robotics 14201 SE Petrovitsky Rd, Suite A3, Box 141 Renton, WA 98058</p>
